L'UNICO

biological formulas, real results

THIS NEW PERFORMANCE DRIVEN SKINCARE RANGE REPRESENTS THE WORLD'S LATEST BIOLOGICAL BREAKTHROUGHS, DELIVERING THE ULTIMATE IN SKIN HEALTH AND BEAUTY.

The L'unico luxury skincare range represents a new era in skincare, merging organic extracts with some of the most powerful biological formulas known to science.

Doctors and practices have a valuable opportunity to be one of the first to stock this impressive new line – which not only promises enhanced skin treatment results but also offers your patients an at-home skincare regimen that is both efficacious and luxurious to use.

Fifteen years ago, Magdy Sedrak, an Australian compounding chemist, challenged himself to combine his passion for nature and his expertise in skincare biology to create a highly effective skincare range like no other. It's called L'unico Laboratory.

L'unico Laboratory uses advanced variations of peptides uniquely engineered to act as a signal to skin cells to help make new collagen, improve the appearance of wrinkles and fine lines, increase the skin's firmness and reduce pigmentation.

L'unico Laboratory's philosophy is to combine scientific knowledge, a detailed understanding of skin biology, and insider knowledge of the skincare industry to unleash the powerful benefits of the highest-quality ingredients through complex, strategic biological processes.

WHEN PERFORMANCE MEETS LUXURY

L'unico Laboratory believes in using science to tap the unlimited potential of nature, utilising high-end ingredients. These include European and American engineered peptides and organic extracts known for their power in combating the signs of ageing skin. Instantly absorbed, the products leave no residue and work to ensure healthy, balanced and glowing skin.

Every base in the range also includes cross-linked hyaluronic acid. L'unico products offer a form that has an ultra-low molecular weight, allowing it to be absorbed

into the dermis. All L'unico bases also contain Vitamin E, a powerful antioxidant that fights the free radicals that damage collagen and cause wrinkles and dryness.

The result is a powerful combination of the best of science and nature to create a skincare range that helps rebuild the skin, noticeably improving the appearance of fine lines and wrinkles, skin tone and texture for smoother, more hydrated and glowing complexion.

Importantly, none of the products contain any phthalates, sulphates, parabens, glycols or lanolin and are not tested on animals.

It's not just the quality of ingredients, or the efficacious base of the formulations – L'unico products are housed in 100% light-resistant packaging to guarantee stability and to protect against oxidation and deterioration by light, meaning the potency of the products remains intact for longer.

PRODUCTS & SERVICES

THE L'UNICO RANGE

Youth Essence Day Cream

This luxurious day cream hydrates the skin all day and works to boost collagen types I, III and IV synthesis, helping to inhibit enzymatic destruction and to minimise unscheduled collagen degradation. It aids maintenance of the skin's moisture balance for adequate skin hydration plus increased tone, elasticity and density.

It also helps to mitigate the damaging effects of UV exposure, while state-of-the-art nanotechnology ensures instant absorption, penetration and delivery into the deeper layers of the skin. It leaves no residue and the skin feels velvety smooth after application. RRP \$240 (50ml)

Regenerative Neuropeptide Night Formula

This rich night cream helps reverse chronological skin ageing markers and reduce the appearance of fine wrinkles and expression lines. It helps boost keratin, protein and collagen types I, II, III and IV synthesis, while helping to minimise photodamage. It contains encapsulated retinol (Vitamin A) in an innovative delivery system to ensure its long-term stabilisation without degradation or oxidation. The proprietary aqueous base contains nanosized ingredients and ensures instant absorption and penetration into the deeper layers of the skin. It leaves no residue and the skin feels richly hydrated after application. RRP \$340 (50ml)

Neuropeptide Firming Eye Therapy

This nourishing eye cream significantly decreases the appearance of puffiness around the eye area and helps to improve the skin elasticity. The innovative

nanosized hydrolysed elastin, combined with the benefits of peptides, helps to restore and correct the delicate skin around the eyes. It also improves the appearance of dark circles and contains potent tocopherols (Vitamin E compounds) and natural antioxidants that act as free radical scavengers. The latest nanotechnology ensures instant absorption, penetration and delivery into the deeper layers of the skin. It leaves no residue and the eye area feels soft and smooth after application. RRP \$160 (30ml)

High Potency 30% Vitamin C Serum

This wonder serum contains a highly stable form of Vitamin C, ascorbyl tetraisopalmitate, or, more specifically, the tetraester of ascorbic acid and isopalmitic acid. This works as a powerful antioxidant and is a potent oil-soluble form of Vitamin C. It helps prevent cellular ageing by inhibiting the cross-linking of collagen, oxidation of proteins and lipid peroxidation. It also works synergistically with the antioxidant Vitamin E, and this serum contains both tocopherol acetate and tocotrienols.

Unlike regular Vitamin C, ascorbyl tetraisopalmitate will not exfoliate or irritate the skin and is well tolerated by even the most sensitive skin types. It can be used in high doses and last for up to 18 months without oxidizing. RRP \$100 (15ml), \$160 (30ml)

Facial Cosmeceutical Cleanser and Facial Protective Toner

With a pH of 5.5, the gentle foaming cleanser thoroughly removes makeup and the day's grime. It contains fortifying actives such as Vitamin A, Vitamin C and Vitamin E to nourish and rejuvenate the

skin at the same time as cleansing. RRP \$70 (250ml)

The protective toner is non-drying and helps to balance the skin's natural pH levels. It also helps reduce pore size, firm the skin and has tightening and moisturising benefits. RRP \$80 (250ml)

Phyto Fruit AHA Micro Peels

These simple and effective at-home micro peels are available in three strengths for three different skin types, fair, olive and dark.

All utilise special face pads soaked in fruit acids to gently exfoliate the outer layer of the

skin, exposing new skin layers that appear brighter, radiant and more even. There is a noticeable decrease in the appearance of fine lines and wrinkles and the skin is left glowing, looking fresher and more even tone. This once a week at-home peeling procedure is an ideal alternative to topical prescriptions or clinic procedures. RRP \$90 (118ml)

Intensive Hydrating Mask

Delivering rich nutrients and ultimate antioxidants protection, this intensive mask provides a radiant glow and an instant moisturising and hydrating effect.

It helps to reduce the appearance of surface imperfections such as fine lines, enlarged pores and discolouration, and the emollient benefits help to increase skin elasticity. RRP \$150 (250g) **AMP**
